## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claim 1 recites the limitation "the above pixel data" in 14. There is insufficient antecedent basis for this limitation in the claim. It is unclear which "pixel data" is being referred to. Similar corrections are required for claims 18 and 35.
2. Claims 1-9, 18-26 and 35-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "permits pixel data output from the video memory to be input to the shading processing section instead of the above pixel data" is indefinite since it is unclear it means the "pixel data" feedback from the video memory is always passed to the shading processing section where the "pixel data" from pixel expanding section is not. If this is the case, then there is no pixel data input to the shading processing section from the pixel expanding section. It seems may be there is some kind control signal or switch to control or switch the input pixel data either from pixel expanding section or output from video memory based on some predetermined information which is not claimed nor shown in the specification or drawing.

### ***Allowable Subject Matter***

3. Claims 10-17, 27-34 and 44-51 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to suggest, in combination with the remaining

elements, a graphics processor comprising a shading processing section, a first and a second paths and a write address calculating section as recited in claims 10, 27 and 44 as whole.
